All mineral resources projects
located in Queensland:

Aeon Metals Limited (“Aeon” or “the Company”) is pleased to announce that a diamond drill rig is on site at the Walford Creek Project and has commenced drilling. As advised in the Company’s announcement of 27 April 2017, the initial focus of the 2017 program is extension drilling to the east/northeast to identify additional Resources to supplement the already announced Vardy Resource. A second drill crew will be on site later this week so that the rig can be drilling on a 24 hour basis.

The area east/northeast of Vardy Resource has seen very limited historical drilling. The 2017 drill campaign will initially test newly interpreted fault splays from the Fish River Fault to the northeast. These are now considered highly prospective structural corridors following detailed litho-geochemical and thin section analysis of some of the 2016 drilling.

Assay results will be announced as soon as they are available.
